right on to Eastern Star Road.

Travel on Eastern Star road 0.7 miles
and turn right onto Winchester Drive.

Travel on Winchester Drive 0.2 miles
and turn left on to Lancaster Road. On Lancaster Road go 0.2
miles, the entrance gate is on the right

AFFIX INFORMATION DECAL HERE.

JCRC Website www.flyjrc.com AMA Website www.modelaircraft.org

Centrally located in the Tri-Cities area.
Just minutes away from the I-81 & I-26 interchange.

*Come visit one of the nicest radio control model flying fields.
Paved runway, lots of parking. Just park and watch from our
bleachers or make an appointment and fly!*

Free flight training... no cost to you for your training. We
will teach you on our aircraft and with qualified instructor pilots.

WHAT DO WE FLY?

Electric airplanes (up to 20 minutes aloft), gasoline or glow-fuel powered planes of all kinds and sizes, flying boats, parasail's, parachutes (well, they really don't fly, but you can guide them down to a safe landing), scale military aircraft, gliders, jets (yep, they are real).

WHAT ELSE?

Aerobatics – ahhh yes, aerobatics! Pattern – that's aerobatics with a plan! Did I mention helicopters, flying wings, even the starship *Enterprise*. You get the picture, almost anything can fly!

WHEN DO WE FLY?

You can usually find someone at the field Saturday morning (except rainy ones) – after about 9. Other good times – Sunday afternoon, weekday mornings and Thursday evenings. The flying hours are posted on the gate. If it's open – come on in! Call for more info on flying times.

WHY DO WE FLY?

You probably know the answer to this – because we love it. We try to be a little modest, too, but we are a great bunch of folks.

HOW LONG DOES IT TAKE TO LEARN TO FLY?

Depends on how good you want to get – like anything else, right? Usually from a week or two for a simple trainer to several years. ~~Most~~ Most all of us are still learning!

Everyone helping out at a fun-fly event.

A trainee pilot with a safety spotter, and an instructor pilot.

Large acrobatic airplane.

Small acrobatic airplane.

A homemade scale WWI German Fokker tri-plane. Made of foam.

Acrobatic plane with smoke. Note, this photo was taken from another remote controlled airplane.

Parasail aircraft in flight.
