EDITOR NOTE

I came across this saying when I was looking for different backgrounds for the news letter.

“Anyone who is interested in model airplanes must have a screw loose someplace.”
Mr. P.B. MacCready

Mr MacCready who was an inventor. He was born in 1925 in New Haven, CT. He was dyslexic and had trouble concentrating but showed passion for things that interested him such as butterflies and trying to figure out how to build one. He harnessed his gift for building model flying machines to win a national contest at age 15. Then went on to get his pilot’s licence at age 16. He went on to invent the MacCready Speed Ring which used by glider pilots the world over to select optimum flight speed.
